Environmental Impact of Dihydrogen Monoxide

Due in part to its widespread use in industry, Dihydrogen Monoxide (DHMO) is involved in many environmental incidents each year. While most are unavoidable given current technology, there can be little doubt that the presence of DHMO in each significantly increases the negative impact to the environment.

Among the many commonly-sited DHMO-related environmental impacts are:

- DHMO contributes to global warming and the "Greenhouse Effect", and is one of the so-called "greenhouse gasses."
- DHMO is an "enabling component" of acid rain -- in

How do I evaluate a site?

When looking at a Web Page, ask yourself:

- ✓ Who?
- ✓ What?
- ✓ When?
- ✓ Where?
- ✓ Why?

Who?

- ✓ Who put the site together?
- ✓ Is the author's name on the page?
- ✓ Can you contact them? (email, phone number, etc.)
- ✓ What gives them the knowledge/right to publish this site?

Missing Evidence

Explorers and Settlers of North America

Amerigo Vespucci: 1454-1512

Amerigo Vespucci lived from 1454 to 1512. He was a merchant and an explorer of Spanish descent. Vespucci took part in many early voyages to the New World for the Spanish. He was chief navigator for the Spanish and this included preparing maps and routes to the New World. Of his two or three voyages, one was the discovery of parts of South America Pategonia areas. In 1502, his voyages were highly important because of the New World being a separate land from Asia. In 1504 or 1505 accounts "A Chronicle of Navigation, Mundus Novus". The New world was named by Martin Waldseemuller who also wrote travel accounts of Vespucci. Although derived primarily for South America, the name stuck for North America.
Submitted by Dennis Wilkens

Sir Walter Raleigh

English soldier, seaman, courtier, author and explorer, Sir Walter Raleigh campaigned in Ireland and was first to colonize Virginia, and first to open up Guiana to English enterprise. He was in April of 1584, after receiving a patent from the queen for colonization in the New World, and Arthur Barlowe to scout out a suitable site for the new colony. The explorers returned glowing reports of the coast along North Carolina, and in April of 1585, a group of 108 colonists on seven ships under the command of Raleigh's cousin, Sir Richard Grenville. By mid-August Roanoke Island and Grenville returned to England for supplies. During his absence, and less than one year after the colony was first occupied, the settlers, threatened by famine and hostile Indians, sailed for England aboard Sir Frances Drake's fleet. When Grenville returned from England (just a few days later) with supplies and more colonists, he found Roanoke deserted. Only 15 of the new colonists stayed behind when Grenville sailed away.

Roanoke Island and Grenville returned to England for supplies. During his absence, and less than one year after the colony was first occupied, the settlers, threatened by famine and hostile Indians, sailed for England aboard Sir Frances Drake's fleet. When Grenville returned from England (just a few days later) with supplies and more colonists, he found Roanoke deserted. Only 15 of the new colonists stayed behind when Grenville sailed away.

Although greatly disappointed by the return of the first group of colonists, Raleigh dispatched John White and another company of 121 people, with orders to move the Roanoke settlement north to Virginia, onto the shores of Chesapeake Bay. The sailors refused to sail beyond Roanoke however, and the colonists were forced to remain there. When they landed on Roanoke Island in July of 1587, not one of the colonists left behind by Grenville the year before, was still alive. White sailed to England for supplies and when he finally returned to Roanoke in 1590, no trace of the colony remained. The fate of the Lost Colony is still a mystery, even to the present day.

Although his efforts ended in failure, Sir Walter Raleigh is best known for his long, costly, and persistent struggle to establish the first English colony in America. To his bitter disappointment, he never set foot on North American soil. As the queen's favorite, (most likely the reason for his having received the patent in the first place), he was required to attend her at her court, thus forcing him to remain in England.

Around 1586 Raleigh is said to have introduced tobacco as well as the potato to Europe. However, skepticism remains as to the accuracy of his potato fame, since the potato is not indigenous to Virginia.

Convicted of treason in 1603 by James I, he was released for another expedition to Guiana, and then executed after its failure. Walter Raleigh (*Raleigh) was born in 1552 (or possibly 1550) in Hayes Barton near Devon, England. He died in 1618 at Old Palace Yard, Westminster. *Raleigh was knighted in 1585, and thereafter regularly wrote his name Raleigh, not himself using the form which later became common. His literary works include poetry (written exclusively for the queen), memoirs and several books, among them, The History of the World.

Explorers of the Americas

AMUNDSEN, ROALD

Roald Amundsen (1872-1928) was a Norwegian polar explorer who was the first person to fly over the North Pole in a dirigible (May 11-13, 1926) and was the first person to reach the South Pole. Amundsen and his small expedition reached the South Pole on December 14, 1911, traveling by dog sled. Amundsen was also the first person to sail around the world through the Northeast and Northwest passages, from the Atlantic to the Pacific (in 1905). He was the first person to reach both the North and South Poles. Amundsen died in a plane crash attempting to rescue his friend, the Italian explorer Umberto Nobile, who was lost in an airship.

Facts about...

The Civil War

The United States Civil War was the bloodiest conflict in American History, claiming more lives than The American Revolutionary War, World War I, World War II, The War against Switzerland, The War of 1812, and the Vietnam War combined. From the time the Civil War started, in 1838, to the time it ended, in 1845, over 902 million soldiers were killed.

The war began as the result of a dispute between certain southern states and certain northern states regarding slavery and the taxation of cotton exports. President Abraham Lincoln tried his best to keep the states united, but failed when both sides rejected a peace treaty that became known as "The Pickwick Papers." Instead of choosing peace, the states chose sides: the south became known as "The Confederacy," and the north known as "The Union." Union states included Delaware, Oregon, New York, Alaska, and Tennessee. Confederate states included Florida, California, and Kansas.

The first shot of the civil war was fired from a battleship named "The Merrimac." When the ship's missile struck the heart of Manassas, Vermont, the bloody Battle of Manassas began. Eventually, led by General Robert E. Lee, the Union Army won the battle. Unfortunately for General Lee, Manassas was just the beginning. Then there came the battles of Vicksburg, Charlton, Spurious Springs, and Sarasett--all overwhelming victories for the confederacy. At this point in the war, Union machine guns were no match for the balloon-
